Site: 001

SILVERMANS FARM INC

Type: ROUTINE INSPECTION

Date: 12-AUG-2014

3.125(a)

FACILITIES, GENERAL.

At the time of this inspection it was noted that the Jacob sheep enclosure was in need of attention. The front, right corner, across from the newly constructed rabbit exhibit had a section of wire mesh that was detaching from the bottom wood rail. This now exposed jagged edges. To ensure that the sheep will be contained and cannot be injured on this mesh it will need to be addressed.

***To Be Corrected By: August 16, 2014

3.131(a)

SANITATION.

While conducting this inspection it was noted that the bison and cattle shelter was in need of attention. There appears to be an accumulation of manure, hay, and mud present. There was also a board lying across the bottom of the doorway. To ensure that the animals have access to a clean and dry shelter, this area will need to be thoroughly cleaned.

***To Be Corrected By: August 16, 2014

An exit briefing was conducted with the licensee.
