Certificate: **23-A-0454**
Site: 001
EMMA M STOLTZFUS

Type: ROUTINE INSPECTION
Date: 22-MAR-2016

3.25(c)

FACILITIES, GENERAL.

Storage. There is an open bag of shavings on the floor in the animal room and a open bag of shavings in the waste disposal area. Supplies of food and bedding must be stored in facilities which adequately protect such supplies against spoilage or deterioration and infestation or contamination. Open bags of shavings used for animal bedding must be stored in a closed container with a lid to adequately protect supplies from infestation or contamination by vermin. Correct by storing open bags of shavings in closed containers to protect supplies. Correct by March 26, 2016.

3.26(d)

FACILITIES, INDOOR.

There are areas on the floor where the white finish is worn or scratched off and the unsealed particle board is present. The floor in the guinea pig room must be impervious to moisture so that the floor can be repeatedly cleaned and disinfected and will not retain odors. The floor must be repaired, sealed, or replaced where the white coating is scratched off so that the floor can be properly cleaned and sanitized. Correct by May 1, 2016.

3.28(a)(1)

PRIMARY ENCLOSURES.

A majority of the enclosures have severely chewed edges on the PVC pipe that surrounds the automatic water valves. At least 69 of the 84 enclosures currently in use have chewed edges on the PVC pipe. The chewed edges could injure the guinea pig while it drinks and the chewed edges makes cleaning and sanitization more difficult. Improperly sanitized surfaces can harbor disease. Primary enclosures including accessories shall be constructed of smooth materials, be structurally sound, and be maintained in good repair. Correct by replacing or repairing the chewed PVC pipes that surrounding the automatic water valves. Correct by May 1, 2016

An exit briefing was conducted with the owner.
