Certificate: **52-C-0160**
Site: TRA
Jennifer Caton

Type: ROUTINE INSPECTION
Date: 01-JUL-2024

3.58(a)

Classification and separation.

During the inspection, a rabbit was housed in the same primary enclosure as two tortoises. Housing rabbits with other species of animals, such as reptiles, can expose them to potential disease hazards which can affect their health. Rabbits shall not be housed in the same primary enclosure with any other species of animals unless required for scientific reasons.
Correct by: July 6, 2024.

3.137(e)

Primary enclosures used to transport live animals.

The transport enclosures for the capybara and cavy did not have the words "Live Animal" or "Wild Animal" clearly marked with arrows or other markings indicating the correct upright position of the enclosure. A lack of clear markings can inhibit correct handling and cage orientation by first responders in the event of an emergency. The licensee must ensure that the words "Wild Animal" or "Live Animal" are marked on the top and on one or more sides with letters at least 1 inch (2.5 cm) high, and have arrows or other markings to indicate the correct upright position of the primary enclosure.
Correct by: July 8, 2024.

This inspection was completed at the Big Butler Fair in Prospect, PA.

This inspection and exit interview were conducted with the licensee and facility representatives.
