### 3.127(d)

#### FACILITIES, OUTDOOR.

##### Perimeter Fence.

The outdoor housing facility where the primary enclosures for 2 Coatimundis, 1 African Crested Porcupine, and 1 Wallaby are located is surrounded by a perimeter fence that is constructed of wire fencing that measured 5 feet in height. The gate into the fenced in area is the only part of the perimeter fence that is the required 6 feet in height.

Per this Section of the Regulations, all outdoor housing facilities where non-dangerous animals are housed must be enclosed by a perimeter fence that is 6 feet high. The perimeter fence protects the animals housed outdoors by restricting other animals and unauthorized persons from going through or underneath the fence and having contact with the animals in the facility. In addition the perimeter fence functions as a secondary containment system for the facility's animals that are housed outdoors.

The height of the perimeter fence surrounding the outdoor enclosures that house 2 Coatimundis, the African Crested Porcupine, and the Wallaby needs to be increased to 6 feet to protect the animals.

Correct by 9/1/20

NOTE - Exit interview held 7/30/20 on-site with Licensee. Report delivered by email 7/31/20.
