Environment enhancement to promote psychological well-being.

Although the facility does provide appropriate enrichment within the enclosures that address the requirements of this plan, the facility did not have a documented environmental enhancement plan to promote psychological well-being of their avian species as required. The plan is necessary to ensure the psychological health and well-being of the birds. A lack of environmental enrichment can negatively impact the birds' health and welfare. The facility must develop, document and follow a species appropriate plan for environment enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian, and at a minimum must address social grouping, environmental enrichment, special considerations, restraint, and exemptions to the plan.

Correct by 2/7/24

This inspection and exit interview were conducted with a facility representative.
