Type: ROUTINE INSPECTION
Date: 10-SEP-2024

3.13(b)(4)

Veterinary care for dogs.

The written program of veterinary care states that sampling and/or treatment for blood parasites will be "at time of routine preventive care exam for adult animals or upon quarantine examination." However, there were no records provided that document when heartworm tests were done for the two coyote hybrids and one other dog used for exhibiting. Medical records are necessary to ensure the health of the animals and to ensure that the guidance of the attending veterinarian is being followed.

The AWA regulations require medical records with dates and findings/results of all screening, routine, or other required or recommended tests or examinations (for dogs and dog hybrids).

Correct (at the next annual preventive care exam[s] by AV) by: February 18, 2025.

This inspection and exit interview were conducted with the licensee.
