Critters Exotic Pets

Type: ROUTINE INSPECTION  
Date: 08-FEB-2017

### 2.40(a)(1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The facility has a written program of veterinary care however, it is incomplete. A young domestic cat is currently living in the store, roaming free and interacting with other regulated animals on the premises. The owner provided information that she administered two vaccinations to the kitten in the month of January. The program of veterinary care does not list vaccinations, parasite treatment or control, euthanasia method or any other provisions for veterinary care for cats.

The program of veterinary care should be completed by the attending veterinarian to accurately reflect the practices at this facility for domestic cats. The written program will ensure that there is accurate communication between the licensee and the attending veterinarian and ensure that all routine medications and vaccines provided to the animal by the licensee are done with the direction and knowledge of the attending veterinarian. Correct by: February 22, 2017.

### 3.131(c)

#### SANITATION.

The painted wooden interior door separating the animal housing area from the grooming/boarding section was damaged by a dog. The door has a large hole extending completely through the door involving approximately one quarter of the surface area. The damage exposes bare wood and splintered edges.

Cleaning of the door surface and function of the door will now be compromised. Buildings must be kept in good repair to facilitate husbandry practices and protect animals from potential injury. The door should be repaired or replaced. Correct by: March 8, 2017.

The inspection and exit interview were conducted with the manager.

Prepared By: MOORE MARY, D V M USDA, APHIS, Animal Care
