TREGEMBO ANIMAL PARK

Type: ROUTINE INSPECTION

Date: 12-DEC-2024

3.125(a)

Facilities, general.

***A section of fence at the side of the camel shelter has become rusty with severe corrosion along the bottom edge of a section approximately 8 feet in length. The corrosion has left gaps in a location that may allow the camel to get its toes hung up beneath the edge of the metal and become injured. There is also a portion that has what appears to be tin that has rolled back and become separated from the panel.

The fence is in disrepair and shall be repaired to protect the camel from injury.

Correct by December 31, 2024.

This inspection and exit interview were conducted with the Manager.
