Certificate: **57-B-0155**  
Site: 001  
VICKIE CARTER

Type: ROUTINE INSPECTION  
Date: 26-MAR-2014

### 3.125(a)

#### FACILITIES, GENERAL.

Sec. 3.125 Facilities, general.

(a) Structural strength. The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

The floor, on the rear right portion of the glider room, appeared to be maintaining moisture. The owner explained that there is a leak in the building that is still in need of repair. This leak, leaving moisture and water on the floor, is a health hazard for the animals involved. Mold and bacteria can grow under the flooring and in the walls of a consistently wet area. Areas housing the animals must be kept in good repair to protect the animals involved.

To Be Corrected by April 15th, 2014.

### 3.131(c) REPEAT

#### SANITATION.

(c) Housekeeping. Premises (buildings and grounds) shall be kept clean and in good repair in order to protect the animals from injury and to facilitate the prescribed husbandry practices set forth in this subpart. Accumulations of trash shall be placed in designated areas and cleared as necessary to protect the health of the animals.

\*\*\*There is feed, feces and waste material on the floors and in the troughs in the room housing the sugar gliders. Poor housekeeping increases the risk of disease. The room shall be cleaned and items for use on the sugar gliders shall be maintained in a manner that will protect from contamination and minimize disease hazard.

This inspection and exit interview was conducted by the ACI, with facility representative.
