Site: 001  
RAINBOW RANCH INC

Type: ROUTINE INSPECTION  
Date: 15-FEB-2024

### 3.127(d)

#### Facilities, outdoor.

There is an outdoor enclosure that contains three red Kangaroos that had approximately 80ft of its perimeter fence damaged after a storm. The 80ft of perimeter fence has not been replaced on the field side of the enclosure.

The perimeter fence acts as a secondary containment area or additional barrier to prevent other animals/people from gaining access to the regulated animals.

All outdoor housing facilities (i.e., facilities not entirely indoors) must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out. Fences less than 8 feet high for potentially dangerous animals, such as, but not limited to, large felines (e.g., lions, tigers, leopards, cougars, etc.), bears, wolves, rhinoceros, and elephants, or less than 6 feet high for other animals must be approved in writing by the Administrator. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility. It must be of sufficient distance from the outside of the primary enclosure to prevent physical contact between animals inside the enclosure and animals or persons outside the perimeter fence. Such fences less than 3 feet in distance from the primary enclosure must be approved in writing by the Administrator.

To be corrected by: March 15, 2024

This inspection and exit interview were conducted with licensee.
