ODYSEA AQUARIUM

Type: FOCUSED INSPECTION

Date: 21-NOV-2023

2.131(b)(1)

Handling of animals.

During training on 12 November 2023 for Makani, a 20-year-old male flighted Green-winged macaw, the bird deviated from his flight path next to an uncovered pool housing sharks. The bird flew over the pool and landed in the water, flapping at the surface level no longer than 30 seconds before a trainer was able to rescue him. He was evaluated same day by a veterinarian and determined to have no injuries and no evidence of aspiration of pool water. Handling of all animals shall be done as carefully as possible in a manner that does not cause trauma, overheating, excessive cooling, behavioral stress, physical harm or unnecessary discomfort.

Correct from this date forward of 28 November 2023.

3.154(c)(1)

Environment enhancement to promote psychological well-being.

There is no developed and documented plan for additional environment enhancement for nestlings, chicks or fledglings. At time of inspection, a single African Penguin chick is being parent raised in a designated room with hutches, but there is not a written plan for this additional environment enhancement. Failure to develop and document a plan for special consideration birds may result in inadequate or intermittent care in promoting and addressing needs for nestlings, chicks or fledglings. Certain birds must be provided special attention regarding enhancement of their environment in accordance with the instructions of the attending veterinarian.

Correct by 28 December 2023.

3.154(c)(2)

Environment enhancement to promote psychological well-being.

At time of inspection, there was no developed and documented plan for additional environment enhancement for birds showing signs of psychological distress. An adult blue-and-gold macaw "Calypso" is under veterinary care for chronic feather plucking affecting multiple body regions including legs and abdomen. Facility representatives report Calypso is receiving additional environment enhancement, but the plan is not written. Failure to develop and document a plan for special consideration birds may result in inadequate or intermittent care in promoting and addressing their psychological
