Certificate: 22-R-0144
Site: 005
INTERVET INC

Type: ROUTINE INSPECTION
Date: 13-JUN-2016

2.36(b)(1)

ANNUAL REPORT.

The annual report filed in 2015 had guinea pigs listed in category C which should have been listed in category D according to the use of the animal in the protocol.

The annual report shall assure acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research. In order to comply with this section of the regulations animals must be reported in the appropriate category according to the procedures conducted with the animals and the use of anesthesia, analgesics, etc. To be corrected by 7-15-2016.

3.1(c)(2)

HOUSING FACILITIES, GENERAL.

The igloo houses inside the dog enclosures had chewed/rough edges and a toy ball was also chewed. In order to properly sanitize these objects and surfaces and to prevent injury to the animals from swallowing a piece of the chewed surface or cutting their gums with the rough edges, all surfaces must be maintained or replaced on a regular basis. It was corrected while conducting the inspection.

3.1(f)

HOUSING FACILITIES, GENERAL.

Inspection Report

While being replaced, a diluted foot dip solution which contained the disinfectant Virkon S was poured into the hallway outside of the cat holding area. Some of this solution was observed going from the hallway under the door into the cat holding area. Cats were seen smelling and walking on the fluid.

A system is needed to ensure that fluid containing chemicals, such as this do not reach animal holding areas. .
To be corrected by as soon as possible.

An exit interview was conducted with the quality technical director, attending veterinarian, and director of biology-discovery.
