ZOOLOGICAL DE P.R. AT MAYAGUEZ

Type: ROUTINE INSPECTION

Date: 11-AUG-2015

2.40(b)(3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The adult male lion had small areas (approx. 1" diameters) of hair loss and red, raw, skin on all four legs. The attending veterinarian informed the inspectors that he already received the animal health reports for today, and that he was not informed of these lesions which appeared to be affecting the lion for more than just one day.

A mechanism for zoo personnel to report animal health illnesses and diseases to the veterinarian shall be established and maintained, so that he may diagnose and treat the animals, assess their environment for contributory causes, hasten their healing, alleviate pain, & discomfort.

To be corrected immediately.

3.125(c) REPEAT

FACILITIES, GENERAL.

All of the meat inside the walking freezer was soft to touch indicating that it was not frozen. The temperature logs showed consistent temperatures above 32 degrees F. since August 1, 2015. The licensee indicated that this freezer was repaired on August 6th, and then again yesterday. The temperature today was above 50 degrees F.

There were also dirt, dried frozen blood, whole fish, and pieces of meat on the floor and between the pallet slats in this freezer. The chest freezer also had dried frozen blood and unbagged whole fish which was frozen within the ice/frost crystallizations on the bottom. This freezer shall also be cleaned as often as necessary to prevent food spoilage & contamination.

All frozen meat shall be maintained at or below freezing temperatures and in a clean environment to minimize contamination, spoilage, and deterioration.

Prepared By: LUIS NAVARRO, D V M USDA, APHIS, Animal Care

Inspection Report

3.131(c) REPEAT

SANITATION.

Excessive dust, dirt, insects, discarded equipment, & a plastic water bottle were again observed on the top of one of the commissary cabinets and/or on top of the walk-in cooler. This doesn't facilitate the prescribe husbandry practices.

Premises (buildings and grounds) shall be kept clean to facilitate the prescribed husbandry practices set forth in this subpart.

This was a focused inspection to reinspect all of the non compliances & non compliant areas identified on the last inspection.

The exit interview was performed with the attending veterinarian.

Inspection was performed by Luis Navarro, D.V.M. & Robert Brandes, D.V.M.

Additional Inspectors

Brandes Robert, Veterinary Medical Officer
