

## Inspection Report

Marlieta Montz  
30434 Rolling Hills Drive  
Valley Center, CA 92082

Customer ID: **43727**  
Certificate: **93-C-1127**  
Site: 002  
MARLIETA MONTZ

Type: ROUTINE INSPECTION  
Date: 03-AUG-2017

### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Pepper, the pot bellied pig, had overgrown hooves that have not been trimmed recently. The overgrowth of hooves/nails may cause the animals discomfort and lead to injuries or lameness if not appropriately addressed. The facility shall establish and maintain an adequate program of veterinary care that includes timely, adequate hoof/nail care and trimming when needed.

Correction date: 14 August, 2017

### 2.126(a)(2)

#### ACCESS AND INSPECTION OF RECORDS AND PROPERTY; SUBMISSION OF ITINERARIES.

Required facility records including the program of veterinary care, animal inventory/acquisition records, and records of animal dispositions were not available for review at the time of inspection. The unavailability of the required records does not allow APHIS Officials to determine if the records are accurate and complete, that the program of veterinary care is being followed to ensure the health of the animals, or for the proper tracking of the animals. All required records at the facility must be maintained so they are available for review at the time of inspection.

Correction date: 14 August, 2017

### 3.125(a)

#### FACILITIES, GENERAL.

The enclosures for the sheep and goats contained elements that are potentially hazardous to the animals:

- The sheep & goat enclosure had damaged wire with sharp points inside the enclosure, within reach of the animals.
- The sheep & goat enclosure contained plywood pieces with jagged holes, where the animals could injure themselves. Several plywood panels showed deterioration of the wood, threatening the structural integrity of the enclosure.

Failure to maintain enclosures in good repair could result in injury or escape. Sharp wire points and jagged holes in plywood could cause injury and impact the welfare of the animals. Deteriorating surfaces present an ingestion risk,

## Inspection Report

---

threaten structural strength, and impede cleaning. Enclosures should be maintained in good repair, so that they can be kept clean and should be regularly repaired so as to maintain their structural integrity and prevent escape or injury. A system of maintenance should be in place to protect the animals from injury and to ensure their health and well-being.

Correction date: 14 August, 2017

This is a new site inspection. All items at this new site must be compliant prior to conducting regulated activities.

This inspection and exit interview were conducted with facility representatives.
