BEST WESTERN SEABROOK INN

Type: ROUTINE INSPECTION

Date: 12-AUG-2014

3.130

WATERING.

There was an accumulation of algae and grime inside the water bottles in the rabbit enclosure. The method of cleaning the water bottles described to the USDA inspector consisted of rinsing the bottles with clean water and replacing with fresh water. The facility must ensure that all water receptacles remain clean and sanitary for the health and well-being of the animals. The facility replaced the water bottles with new bottles during the inspection.

This item was corrected at the time of inspection.

An exit briefing was conducted with the facility's General Manager.
