Winslow Farm Animal Sanctuary

Type: ROUTINE INSPECTION

Date: 31-JAN-2024

2.75(b)(1)

Repeat

Records: Dealers and exhibitors.

There were no records of acquisition or record of animals on hand available at the time of the inspection for the peacocks, white pigeons, swans/geese, chickens, ducks, turkey, and white doves on the premises; and there were no records of acquisition available for the 5 rabbits acquired since the last inspection.

Per this Section, exhibitors shall make and maintain complete records regarding the details of the acquisition and disposition of animals in their possession in order to account for all animal transfers and the sources of the animals. The Licensee needs to prepare records of acquisition and a record of animals on hand for these birds and 5 new rabbits and ensure that the animal records are kept current for all future animal acquisitions.

Environment enhancement to promote psychological well-being.

Although the birds at the facility were socially housed and were provided with materials to enhance their environment, a written plan for environmental enhancement to promote the psychological well-being of the birds still had not been developed and was not available for review at the time of the inspection.

Per this Section, exhibitors must develop, document, and follow a species-appropriate plan for environment enhancement to promote the psychological well-being of birds. The plan must be approved by the Attending Veterinarian and must be in accordance with currently accepted professional standards as cited in appropriate professional journals or reference guides. At a minimum, the plan must address each of the following: social grouping, environmental enrichment, special considerations, restraint devices, and exemptions. The Licensee needs to develop an environmental enrichment plan appropriate for the species of birds maintained and the plan must be approved by the Attending Veterinarian.

This inspection and exit briefing were conducted with facility representative.
