Type: FOCUSED INSPECTION

Date: 22-JUL-2021

3.58

Classification and separation.

During this inspection it was noted that 2 rabbits were being housed with a pot belly pig. Rabbits shall not be housed in the same primary enclosure with any other species. To ensure the health and well being of the rabbits this situation will need to be addressed.

***To Be Corrected By: August 10, 2021

3.125(a)

Facilities, general.

During this inspection it was noted that the wallaby enclosure is in need of repair. The walls of the enclosure are constructed of fake rock work and bamboo slats. However, there are at least 4 areas where the bamboo slats are 8" - 12" apart. These gaps are large enough to allow people to gain access to the animal and also for the animal to escape or injure itself. To ensure the animal is securely contained within this enclosure, these areas will need to be addressed.

***To Be Corrected By: July29, 2021

This inspection and exit interview were conducted with a facility representative.
