Type: ROUTINE INSPECTION
Date: 19-APR-2016

2.40(b)(2) DIRECT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Sec. 2.40 Attending veterinarian and adequate veterinary care (dealers and exhibitors). (b)(2)

**** During the inspection heard puppy whining and looked into enclosure and seen the left front leg missing fur and the mother was grooming the puppy. The puppy number is 2016-69 a cavalier/poodle mix. I asked licensee to pull the puppy out of pen to better observe the puppy, that is when I saw the rear paws missing fur and the affected areas are red and a cream colored puss like material observed in the affected areas. Licensee said the mom killed the other puppy and asked if its time to retire the mom. Told licensee that puppy must be taken to the attending veterinarian today. The excessive grooming behavior that mother is doing is harming the puppy health and well being. Daily observation of all animals in the facility to prevent, control, diagnose, and treat disease and injuries when needed and or stop them from getting worse.

Licensee called while I was writing report to tell me that the vet had euthanized the puppy.

To be corrected by: 04-21-2016

3.1(f)

HOUSING FACILITIES, GENERAL.

Sec. 3.1 Housing facilities, general.(f) Drainage and waste disposal.

**** During the inspection of the outside portion of the enclosures next to the well house that is approximately 2 feet from the pens and excessive amount of fecal matter is piled against the well house and inside the well house floor. This excessive pile of fecal matter will draw pest, create and odor and possible disease risks to the dogs in the facility. The fecal matter must be removed to minimize vermin and pest infestation, insects, odors and disease hazards.

Inspection Report

Sec. 3.3 Sheltered housing facilities (c) Lighting.

**** In the adult side of the facility 4 of the 6 lighting units are not working. Lack of proper lighting does not allow routine inspection of the animals or facility and proper cleaning of the facility. Facility must have appropriate lighting to ensure proper observation of dogs, cleaning of the facility and maintenance of the pens and building.

3.3(e)(1)(3)

SHELTERED HOUSING FACILITIES.

Sec. 3.3 Sheltered housing facilities(e) Surfaces. (1)(iii)

**** There are two inside enclosures and three outside enclosures around the dog doors that have areas that the dogs have chewed the diary board/ metal off and exposed the plywood. These areas are not being maintained regularly and exposes wood that is not impervious to moisture. Need to repair or replace these areas to ensure the surfaces are impervious to moisture.
