San Francisco, CA 94132

Customer ID: **3373**

Certificate: **93-C-0003**

Site: 001

SAN FRANCISCO ZOOLOGICAL GARDENS

Type: ROUTINE INSPECTION

Date: 02-JUL-2015

3.101(a)(3)

FACILITIES, GENERAL.

In the sea lion enclosure the paint is peeling off of the underwater surfaces of the pool. All surfaces should be maintained in good repair so that they can be adequately cleaned and disinfected, and so that they do not generate particles that could be ingested, or become otherwise problematic, such as to filters or drains.

Steps should be taken to repair the surfaces of the pool so that they are durable, nontoxic, and easy to clean and disinfect as appropriate.

To be corrected by 10/6/15.

This was a focused inspection on the primate housing issues cited on the last inspection report, the commissary, felines, bears, and marine mammals.

An exit interview was conducted with the vice president of animal care.
