Type: ROUTINE INSPECTION
Date: 14-DEC-2016

3.1(c)(1)(ii) REPEAT

HOUSING FACILITIES, GENERAL.

There are screws with the sharp points penetrating through the wood of 2 shelters, affecting 3 dogs. These sharp points, at the dogs level, could cause injury to the dogs. The licensee must repair these shelters so that there are no sharp points and ensure that all enclosures are free of sharp points and edges which may cause injury to the dogs.

3.4(b)(4)

OUTDOOR HOUSING FACILITIES.

There are 3 dog shelters, containing 4 dogs, that did not have enough bedding provided. There was some bedding inside of the shelters but the bare floor was visible. When the temperature drops below 50 degrees Fahrenheit bedding must be provided for the dogs to stay warm. The amount of bedding must be in the amount that allows the dogs to burrow down into the bedding. When the temperature drops below 35 degrees Fahrenheit more bedding must be added for the dogs to stay warm and protect them from the extremes of the cold weather. Licensee corrected this at the time of inspection.

3.4(b) REPEAT

OUTDOOR HOUSING FACILITIES.

At the time of inspection there was no shade structure provided for 11 dogs housed in an outdoor enclosure. The licensee had recently moved the outdoor enclosures a couple weeks ago and had not yet replaced the shade structures. During the daylight hours one or more separate outside areas of shade must be provided, large enough to contain all the animals at one time and protect them from the direct rays of the sun. The licensee must provide areas of shade for every dog in an outdoor enclosure throughout the daylight hours.

Inspection Report

3.4(c)

OUTDOOR HOUSING FACILITIES.

In an outdoor enclosure, containing 1 dog, there is a large hole chewed in the corner of the shelter, approximately 1 ft x 6 in. This shelter must be repaired or replaced so that it will protect the animal from the elements of the weather.

The licensee must ensure that all surfaces in an outdoor enclosure that are no longer in good repair are replaced or repaired to protect the animals from the elements of weather at all times.

To be corrected by: 12 Jan 17

This inspection and exit interview were conducted with licensee
