Inspection Report

Inadequate space during transport can cause stress, uncomfortable conditions, and prevents normal postural adjustments. Primary enclosures used to transport live dogs must be large enough to ensure each animal has enough space to turn about normally while standing, to stand and sit erect and to lie in a natural position.

This inspection was conducted with animal facility representatives on 4/17/2023. The exit interview was conducted by phone with an airline representative on 4/19/2023.
