WOODSTONE MEADOWS
STABLES INC

Type: ROUTINE INSPECTION

Date: 07-JUL-2025

3.158(a)(1)

Cleaning, sanitization, housekeeping, and pest control.

The nesting boxes within the bird enclosure housing 12 chickens and 4 peafowl are not being cleaned as often as necessary to prevent excessive accumulation of feces and food waste. Within the sheltered coop, there are a series of nest boxes available for the poultry that have accumulations of fecal matter, shavings, egg shells, and debris inside. One box has clear, gelatinous liquid sitting in the front left corner of the box, potentially egg white from the broken egg shells present. Boxes with accumulation of food waste and fecal matter can lead to soiling of the birds if they choose to use the next boxes along with an increased risk of disease hazards, insects, pests, and odors. Correct by 11 July 2025 by ensuring excreta and food waste are being removed from primary enclosures as frequently as necessary to prevent excess accumulation of feces and food waste, to prevent soiling of the birds contained within the primary enclosures, and to reduce disease hazards, insects, pests and odors.

This inspection and exit interview were conducted with the manager.
