

Inspection Report

Paul Urbanec
1912 Hwy. 94
Pender, NE 68047

Customer ID: 36515
Certificate: 47-A-0540
Site: 001
Paul Urbanec

Type: ROUTINE INSPECTION
Date: 08-DEC-2015

3.3(e)(1)(2)

SHELTERED HOUSING FACILITIES.

* The outside concrete flooring, used to house six adult dogs, is wet. The moisture and fluid waste are soaking into the surface. Approximately half of the surface is not exposed to the direct sunlight. The owner stated, that the surface had not been treated. This surface does not allow for proper cleaning and sanitization, thus increasing the disease potential for the dogs.

All concrete surfaces that come into contact with the animals must be impervious to moisture. A surface impervious to moisture will allow for rapid runoff of water and fluid waste. Additionally the surface will allow for proper cleaning and sanitation. Proper cleaning and sanitation will reduce the disease potential for the dogs.

To be corrected by, 30-April-2016.

3.6(a)(1)

PRIMARY ENCLOSURES.

* The corner of the building in the west end enclosure for large dogs had large gaps between the wood, exposed nails protruding inward and exposed bare wood. This can potentially lead to injury to the one adult German Shepherd housed in the enclosure.

All enclosures must be kept in good repair. This will reduce the potential to injury to the animals.

To be corrected, 30-December-2015.

This inspection and exit interview was conducted with the facility representative, Randall Wagner (ACI) and Karl Thornton (ACI).
