Knoxville, IA 50138

Customer ID: **501828**
Certificate: **42-B-0304**
Site: 001
TIM GALEAZZI

Type: ROUTINE INSPECTION
Date: 05-MAR-2018

2.40(b)(2) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Female Chihuahua (microchip #OAO1374058) has excessively long nails on both front and back feet and the toenails are starting to develop a severe curve. Overgrown toenails interfere with the ability of the dog to stand normally and can get caught in the wire cage flooring causing injury to the dog's foot.

The licensee needs to trim the dog's nails to an acceptable length. Licensee must insure that the toenails of all dogs are kept at an acceptable length at all times.

The dog's nails were cut by the facility representative at the time of the inspection.

3.6(c)(1)(iii)

PRIMARY ENCLOSURES.

The primary enclosures of three dogs in the whelping area were not of appropriate size to allow for 6 inches of head space above the dogs' heads. Failure to provide dogs with adequate head space may not allow for freedom of movement and normal postural behaviors.

Licensee must provide primary enclosures for dogs that include at a minimum of 6 inches of headspace above the dogs' heads to ensure the dog's health and well-being.

Correction date: The 3 dogs were moved to compliant enclosures by the facility representative at the time of the inspection.

Inspection and exit interview were conducted with the facility representative and Kelly Maxwell ACI and Katie Steneroden VMO.
