Certificate: **84-R-0003**  
Site: 001  
COLORADO STATE UNIVERSITY

Type: ROUTINE INSPECTION  
Date: 09-AUG-2022

---

### 2.31(e)(2)

#### **Institutional Animal Care and Use Committee (IACUC).**

In the IACUC approved protocol 3189, there is not an adequate rationale for the appropriateness of the numbers of animals to be used. The protocol does not include an explanation for the number of animals that were requested which does not allow the IACUC to determine if this number of animals is appropriate for the proposed work.

Failure to provide and review this detail can result in an excess of animals used and euthanized. The registrant must ensure that all protocols contain not only a rationale for involving animals and the appropriateness of the species, but also the rationale for the appropriateness of the numbers of animals to be used.

To be corrected by August 26, 2022.

### 3.131(a)

#### **Repeat**

#### **Sanitation.**

-There is an accumulation of feces in the two veterinary teaching sheep pens that covers a majority of both shelter floors.

At the time of inspection, the sheep were utilizing the shelter in the north pen for shade and there was no space in that shelter that they could occupy that was free of excreta.

-There is an accumulation of feces in the veterinary teaching sheep barn pasture that covers a majority of one of the shelter floors. At the time of inspection, the sheep were utilizing the shelter for shade and there was no space in that

## Inspection Report

---

shelter that they could occupy that was free of excreta.

Accumulations of excreta are especially of concern when they occupy an animal's shelter structure or interfere with its access to food and water sources. These areas also attract pests and can play a role in disease transmission. The registrant must ensure that excreta be removed from primary enclosures as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and odors.

This inspection was conducted from 8/9/22 to 8/11/22 and the exit interview was conducted on 8/11/22 with facility representatives.

Additional Inspectors:

TYLER FIELDS, VETERINARY MEDICAL OFFICER
