MICHAEL TODD

Type: ROUTINE INSPECTION
Date: 28-APR-2016

2.3(c) REPEAT

DEMONSTRATION OF COMPLIANCE WITH STANDARDS AND REGULATIONS.

At the time of this inspection the manager stated that the tigers are housed at a site in Kaufman, TX when not traveling. This is not an approved site. This licensee did notify USDA of a new site in Kaufman, TX, however the facility was not in compliance on the new site inspection conducted 7/26/12. The inspection report from 7/26/12 states: No regulated activities may be conducted until this site is in compliance with the Animal Welfare Act. Tigers housed at the Kaufman site should not be on exhibit until that site can pass an inspection.

Another employee stated that the farm animals are housed at a second site in Kaufman, TX. This site has had no inspections by USDA officials. It is not an approved site. Animals housed at this site cannot be used for regulated activities until the site has passed a USDA inspection.

2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The manager provided USDA officials with two Programs of Veterinary Care (PVC). One for a veterinarian in Terrell, TX and one for a veterinarian in Harvard, IL. The only portion of either PVC form that was filled out was the section for the Veterinarians' contact information. USDA officials were also provided with three supplemental sheets with "Program of Veterinarian Care Details for 33-C-0388" as the title. These three sheets had a few very vague veterinary recommendations. The only species identified were tigers, cougars, and other large felids with one reference to blood parasites in goats. The rabbits, pigs, and cattle were not addressed at all. There were no signatures or dates on the supplemental information confirming they were provided by one or both of the attending veterinarians.

Licensees' with part time attending veterinarians must have a formal written arrangement with a veterinarian (PVC) that addresses the preventive care for all regulated species. This is required so that USDA personnel can confirm that the licensee is working with a knowledgeable veterinarian and is following the recommendations from that veterinarian.

In the case of multiple attending veterinarians, the species/duties that each veterinarian is responsible for must be identified.

Inspection Report

A program of veterinary care needs to be developed by one or both attending veterinarian that addresses all regulated species owned/exhibited by the licensee and the division of duties/species between the veterinarians.

Topics that should be covered in the PVC include but are not limited to:

- *The veterinarian's schedule for visits to the facility.
- *Parasite control program if appropriate for the species.
- *Vaccination recommendations if appropriate for the species.
- *Routine medical testing if appropriate for the species.
- *Instructions on necropsies for unexpected deaths.
- *Hoof trims for animals with chronic hoof problems.
- *Diets appropriate for each species
- *Any other medical/husbandry recommendations the veterinarian feels necessary for this facility.
- *Emergency contact information.

The PVC must be signed and dated by the attending veterinarian. This document must indicate to USDA representatives that the licensee and the veterinarian have an active working relationship.

To be corrected by June 1, 2016

2.125

INFORMATION AS TO BUSINESS; FURNISHING OF SAME BY DEALERS, EXHIBITORS, OPERATORS OF AUCTION SALES, INTERMEDIATE HANDLERS, AND CARRIERS.

USDA officials requested confirmation of employment for the manager, Lisa Lopez, and Tommy Bishop multiple times during this inspection. The manager's response was she "would let the lawyers deal with that". Licensees must furnish to USDA officials any information concerning the business requested by USDA officials. The licensee needs to provide confirmation of employment for Lisa Lopez and Tommy Bishop to the Animal Care Western Regional office.

To be received at the Western Regional Office by May 16, 2016.

2.126(c) REPEAT

ACCESS AND INSPECTION OF RECORDS AND PROPERTY; SUBMISSION OF ITINERARIES.

At the time of this inspection the Animal Care regional offices located in Ft. Collins, CO and Raleigh, NC had not received an itinerary from the licensee prior to overnight travel. The lack of a required itinerary was also noted on

Inspection Report

the inspection reports dated 5/16/2015, 8/20/14 and 11/3/14. The licensee must submit an itinerary to the Regional Director no fewer than 2 days in advance of travel whenever the animals will be exhibited at a location other than the approved site(s) and whenever travel extends overnight. The itinerary shall contain complete and accurate information concerning the whereabouts of all animals intended for exhibition at any location other than the approved site.

3.129(a)

FEEDING.

The diet for the tigers at the time of this inspection consisted of chicken breasts and boneless pork roasts. The manager said they supplemented with "Felid T" vitamins. She showed us a white powder in a Tupperware container that had a duct tape label with Felid T written on it. A product container for Felid T was not available for review to determine if the correct amount of supplement was being given nor were there written instructions from one of the attending veterinarians. A diet of muscle meat without the correct supplements is not an adequate diet. Inadequate diets can lead to health conditions such as skeletal damage, neurological problems and other potentially irreversible health problems. A veterinarian knowledgeable with large felid nutrition needs to be consulted for the appropriate diet recommendations.

The manager was asked at the beginning of the inspection if she would be taping the inspection. She confirmed she would be.

Inspection and exit interview conducted with the manager, ACI Donovan Fox, and VMO Cindy DiGesualdo at Mayfest in Ft Worth, TX.
