Certificate: **73-A-2636**

Site: 001

RANDALL MILLER

Type: ROUTINE INSPECTION

Date: 13-MAR-2015

---

### 3.6(a)(1)

#### PRIMARY ENCLOSURES.

An indoor/outdoor enclosure housing three dogs has a large, rough edged hole in the interior wall of the enclosure next to the access door. The hole is in the interior wall only, with a solid exterior wall behind it. This hole can be reached by the dogs, and poses a potential threat of injury and/or limb entrapment. Licensee must relocate the dogs to an appropriate enclosure, and ensure the wall is properly repaired before returning animals to the affected enclosure.

Corrected on the spot.

Inspection and exit interview conducted with facility representative.
