Type: RE-LICENSE INSPECTION

Date: 02-OCT-2024

2.40(a)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

While reviewing the Program of Veterinary Care it was noted that birds had not been listed on the document, although the facility houses peafowl, chickens, a turkey, a red-tailed hawk, and a barn owl. Additionally, the rabbits and deer at the facility were not listed on the Program of Veterinary Care. It was determined that the attending veterinarian was not currently overseeing the veterinary care of these animals. Lack of oversight by an attending veterinarian can delay the diagnosis and treatment of disease in animals. The facility must ensure that it has an attending veterinarian who provides adequate veterinary care to all of its animals. Correct by October 16, 2024.

3.154

Environment enhancement to promote psychological well-being.

Although the birds at the facility were socially housed when appropriate and were provided with materials to enhance their environment, a written plan for environment enhancement to promote the psychological well-being of the birds had not been developed and approved by the Attending Veterinarian and was not available for review at the time of the inspection.

Per this Section, exhibitors must develop, document, and follow a species-appropriate plan for environment enhancement to promote the psychological well-being of birds. The plan must be approved by the Attending Veterinarian and must be in accordance with currently accepted professional standards as cited in appropriate professional journals or reference guides. At a minimum, the plan must address each of the following: social grouping, environmental enrichment, special considerations, restraint devices, and exemptions. The facility must develop an environment enhancement plan appropriate for the species of birds maintained and the plan must be approved by the Attending Veterinarian. Correct by October 16, 2024.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by December 1, 2024, or the applicant will forfeit the license
