Type: ROUTINE INSPECTION
Date: 11-JAN-2024

3.127(c)

Facilities, outdoor.

** The yard in the front of the facility and beside the main building housing deer, goats, cavy and pigs, had large areas of mud and standing water. The animals did have dry space so as not to be in the wet area. However, the facility must improve drainage. Standing water and mud can contribute to hoof and foot problems. The facility must provide substrate and/or drainage to reduce the standing water and mud, to contribute to the health and well-being of the animals. To be corrected by: 02-15-2024.

This inspection and exit interview were conducted with a facility representative.
