

Inspection Report

Hitham Al-Alaweyat
299 Jennings Creek Rd
Marathon, NY 13803

Customer ID: **6023247**
Certificate: **21-B-0217**
Site: 001
Hitham Al-Alaweyat

Type: ROUTINE INSPECTION
Date: 28-APR-2025

3.153(b)(3)

Primary enclosures.

At the time of the inspection, there were 22 doves in a large enclosure with multiple eggs on the ground underneath the perches. The previous baskets used for nests were not staying locked in place and had to be removed from the enclosure. Due to the current reproductive needs of the species, a sufficient number of nests and materials used for nesting must be provided to meet the needs of the breeding birds. This must be addressed for the overall health of the birds.

Correct by: May 5, 2025

This inspection and exit interview were conducted with the licensee.
