JAMES OLESON

Type: ROUTINE INSPECTION
Date: 14-MAR-2024

3.153(a)(2)

Primary enclosures.

In the enclosure housing one Moluccan cockatoo, there are no perches available for the bird to rest on comfortably. The inspector witnessed the cockatoo perching on the metal support beam for the primary enclosure wall, causing the bird to have to press against the chain link fencing.

Appropriate perching for birds is required so that they can perform their normal species behaviors. Failure to provide species appropriate perches may result in discomfort and foot related injuries. The facility must provide perching for birds that rest by perching. Furniture-type objects such as perches must be species appropriate and designed and maintained so that they prevent harm to the bird.

To be corrected by 18 March 2024.

This inspection and exit interview were conducted with a facility representative.
