Certificate: **74-B-0293**
Site: 001
Rancho Raton Inc.

Type: ROUTINE INSPECTION
Date: 30-APR-2019

2.40(b)(2) DIRECT REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Several guinea pigs were noted to have old wounds on their ears and bodies. One hamster had a large scab on its face; and another hamster was observed dragging both rear legs and appeared to be paralyzed. These animals had not received any veterinary care at the time of inspection. The attending veterinarian was contacted, and stated that the licensee needs to contact him regarding proper wound care and injury treatment.

3.31(a)(1)

SANITATION.

Primary enclosure containing one guinea pig and her young had excess accumulation of excreta and debris covering the floor. Excess build-up of feces creates a disease hazard and contaminates the animals. Primary enclosures shall be cleaned and sanitized often enough to prevent an accumulation of excreta or debris.
CORRECT BY 5/1/19.

3.125(d)

FACILITIES, GENERAL.

Four (4) gerbil enclosures each contained a decomposing animal. Licensee stated he was not aware that dead gerbils were present in the identified cages, but was due to clean them within the next day. Dead animals remaining in enclosures pose as a health risk and serve as an attractant of vermin to the remaining animals. Dead animals must be promptly removed to prevent disease hazards.
CORRECT BY : 5/1/19.

3.131(d) REPEAT

SANITATION.

Rodent droppings were identified in all the animal rooms this date. Wild rodents harbor diseases that may harm and kill domestic rodents. Licensee stated that bait stations are refilled monthly. Pest control was also an issue on the inspection of June 26, 2017. Pest control must be increased and an effective control program maintained to provide
