Type: ROUTINE INSPECTION
Date: 04-DEC-2023

3.154(c)(2)

Environment enhancement to promote psychological well-being.

The facility's environmental enhancement plan for birds states that birds showing psychological distress through behavior or appearance will have an assessment by the bird staff, curator, animal welfare coordinator and veterinarian and have a plan created to address enrichment, housing and social grouping, and/or medication. While the birds observed during the inspection showing the results of feather plucking were being given enrichment, these birds have not had the prescribed assessment and a plan created to address the problem. Failure to develop and follow a plan for birds requiring special consideration may result in inadequate or intermittent care in promoting and addressing their psychological well-being. Certain birds must be provided special attention regarding enhancement of their environment in accordance with the instructions of the attending veterinarian. One of these special consideration groups are birds that show signs of being in psychological distress through behavior or appearance. To be corrected by 1 Feb 2024.

This inspection and exit interview were conducted with facility representatives.
