Type: ROUTINE INSPECTION
Date: 07-FEB-2017

3.81(c)(4)

ENVIRONMENT ENHANCEMENT TO PROMOTE PSYCHOLOGICAL WELL-BEING.

At the time of inspection the remaining Owl Monkey was individually housed because the elderly mate had been euthanized within the past month. The Owl Monkey can not see or hear other compatible non-human primates in the current enclosure. The Environmental enhancement plan to promote psychological well-being of nonhuman primates specifies that the Owl Monkey will be pair housed, with no contingency for only one Owl Monkey and no special considerations in the environmental enhancement plan to address the needs of this individually housed nonhuman primate.

The environmental enhancement plan must be updated to provide special attention for individually housed nonhuman primates that are unable to see and hear nonhuman primate species of their own or compatible species.

Correction date: 21 February 2017

3.125(a)

FACILITIES, GENERAL.

In the cheetah enclosures, the front edge of one shelter box was worn to raw wood and the other shelter box had two damaged sections with splintered wood exposed. Deteriorating surfaces present an ingestion risk, threaten structural strength, and impede cleaning. A system of maintenance shall be in place to ensure enclosures are kept in good repair to protect the animals from injury.

Correction date: 21 February 2017

Exit interview conducted with facility representative.

Additional Inspectors
