Austin Zoo  
PO Box 91808  
Austin, TX 78709

Customer ID: **3893**  
Certificate: **74-C-0208**  
Site: 001  
Austin Zoo

Type: ROUTINE INSPECTION  
Date: 22-AUG-2023

---

### 3.80(a)(2)(ii)

#### Primary enclosures.

In an enclosure housing two adult squirrel monkeys, there was a blue plastic tarp covering approximately 1/3 of the roof of the enclosure. The torn plastic edges of the tarp appeared to be outside of the cage, but a facility representative reported that pieces of plastic have been found within the enclosure itself. The squirrel monkeys were climbing around the enclosure. Plastic foreign material can be ingested, posing a potential risk to the health of the animals. The facility must ensure the primary enclosures protect the nonhuman primates from injury.  
Correct by: 08/23/2023.

### 3.153(a)(1)(i)

In a white-fronted Amazon parrot's primary enclosure, there was a piece of sheet metal flashing (approximately 4" wide) wrapped around the top of the nest box where the bird was actively climbing around on. The top edge of the metal was covered but the bottom edge was loose, leaving a visible gap (approximately 1/2" wide). Sharp edges can cause injury to the bird. The facility must ensure that all primary enclosures be constructed and maintained so that they have no sharp edges that could injure the birds.  
Correct by: 8/27/2023.

### 3.158(c)

There were several discarded cages, farm equipment, and other discarded items on the grounds of the area near the maintenance sheds in the back area. The peacocks at the facility are free-roaming and have access to all areas. There were at least three peacocks observed walking or resting under these areas of clutter at the time of inspection. Discarded matter can cause injury to the free-ranging animals as well as serve as living areas for rodents and other pests. The facility must ensure the premises where housing facilities are located, including surrounding grounds, are kept clean to facilitate proper animal husbandry and sanitation.  
Correct by: 9/5/2023.

This inspection and exit interview were conducted with facility representatives.
