Type: ROUTINE INSPECTION
Date: 09-MAR-2023

2.131(c)(1) Critical

Handling of animals.

On January 14, 2023, photographs were posted on social media of guests petting Lucifer, a male juvenile jaguar (DOB approximately 3/28/22) and Betty, a female juvenile Syrian Brown Bear (DOB estimated at no later than 3/1/22), who are both over 16 weeks of age. Lucifer arrived at the facility on 5/2/22 as a 5-week-old. Betty arrived 3/28/22 with no age listed but a weight of 6.5#. Lucifer would have been 16 weeks of age on approximately 7/18/22 while Betty would have reached 16 weeks before 6/21/22. Facility representatives stated that public petting of the juvenile bear and jaguar hadn't taken place since about 12/25/22, but both animals would have still been too large and strong and over 7 & 8 months of age.

Handling of dangerous animals such as jaguars and bears over the age of 16 weeks poses a risk of injury to the public, and maintaining control is questionable even while leashed or distracted by a bottle. Animals of this size are too big, too fast and too strong to be used for public contact. During public exhibition, dangerous animals such as lions, tigers, wolves, bears, or jaguars must be handled by trained facility personnel in such a manner so that there is minimal risk of harm to the animal and to the public, with sufficient distance and/or barriers between the animal and general viewing public so as to assure the safety of both the animals and the public.

To be corrected from this day forward,
