### 3.131(d)

#### SANITATION.

\*\* In the shed there were two palates of feed. On the second palate there was a presence of feces with some corn. On the same palate there was also an open bag of grain with bugs on it. A safe and effective program for the control of insects and mammalian pests shall be established and maintained. Also to further help prevent contamination of feed, a better storing system may help minimize the presence of pests. Correct by September 15, 2016.

This inspection and exit interview were conducted with the Corporate Director.
