

Inspection Report

Sylvia Dishman
904 Beechwood Dr
Dandridge, TN 37725

Customer ID: **42069**
Certificate: **63-B-0167**
Site: 001
SYLVIA DISHMAN

Type: ROUTINE INSPECTION
Date: 26-FEB-2025

3.131(c)

Sanitation.

***The sugar glider enclosures are stacked directly over each other with open bottoms. The facility has stopped using the trays in the bottom of the enclosures which are meant to catch waste material from the cage. The waste material per enclosure is now able to fall through each enclosure into the enclosure below and onto the floor. This process causes cross contamination of the animals housed at the lower levels. The waste material has accumulated on the floor and throughout the room causing increased presence of flying insects that can be a nuisance to the sugar gliders causing discomfort. The licensee stated due to loss of an employee and personal health issues the room has not been cleaned in two weeks causing an increase in the accumulation of waste material.

The room shall be cleaned and the enclosures protected to prevent cross contamination to protect the health and well-being of the sugar gliders. Correct by March 5, 2025.

3.131(d)

Sanitation.

***The excessive accumulation of waste material on the floors in the sugar glider room has attracted small flying insects. The presence of these insects is a nuisance that may cause discomfort to the sugar gliders. Flying insects also pose a risk of disease hazard and contamination that may result in illness.

The room shall be cleaned and sanitized and a safe and effective program for the control of insects established and maintained. Correct by March 5, 2025.

This inspection and exit interview were conducted with the licensee.
