Ocala, FL 34482

Customer ID: **6012764**
Certificate: **58-C-1267**
Site: 001
Petting Zoo Ocala LLC

Type: FOCUSED INSPECTION
Date: 29-JAN-2025

3.84(d)

Cleaning, sanitization, housekeeping, and pest control.

Multiple live rats were seen moving freely in and out of the enclosure housing one squirrel monkey. The facility said that they recently started a new bait program; however, it is currently not effective at controlling rodents at the facility. Pests such as rats can spread disease and contaminate food, surfaces, and animal housing areas. An effective program for control of insects, external parasites affecting nonhuman primates, and birds and mammals that are pests, must be established and maintained so as to promote the health and well-being of the animals and reduce contamination by pests in animal areas.
To be corrected by February 12, 2025.

3.131(d)

Sanitation.

Multiple live rats were seen inside the enclosure housing four ferrets. While the inspector observed, at least five rats were seen moving freely in and out of the enclosure and eating the food left out for the ferrets. The facility said that they recently started a new bait program; however, it is currently not effective at controlling rodents at the facility. Pests such as rats can spread disease and contaminate food, surfaces, and animal housing areas. A safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained.
To be corrected by February 12, 2025.

This inspection and exit interview were conducted with a facility representative.
