Environment enhancement to promote psychological well-being.

At the time of inspection, the facility did not have a documented environment enhancement plan to promote the psychological well-being of their avian species as required by the Animal Welfare Act.

Dealers, exhibitors, and research facilities must develop, document, and follow a species-appropriate plan for environment enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian and must be in accordance with the regulations in this subpart and with currently accepted professional standards as cited in appropriate professional journals or reference guides. This plan must be made available to APHIS upon request, and, in the case of research facilities, to officials of any pertinent funding agency. The plan, at a minimum, must address each of the following: social grouping, environmental enrichment, special considerations, restraint devices, and exemptions.

Correct by September 30, 2024.

This inspection and exit interview were conducted with the facility representative.
