3.6(a)(2)(i)

Primary enclosures.

The outdoor runs of the primary enclosures for approximately 32 dogs are not being properly maintained. Approximately 11 of the chain link fencing dividers have sharp points present along the concrete floor. Additionally, there are fence ties at differing heights in the runs that create sharp points. Failure to ensure that enclosures are free from sharp points or edges can expose the dogs to discomfort or injury. The facility must ensure that primary enclosures are constructed and maintained so that they have no sharp points or edges that could injure the dogs.

This is a 1st Re-License Inspection for a Class "A" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by 20-July-2025 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
