Type: ROUTINE INSPECTION  
Date: 09-NOV-2015

### 2.40(a)(2) DIRECT

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

An adult male Yorkshire terrier with USDA tag# 12 and adult female Shih Tzu with USDA tag #14 were identified by the attending veterinarian on May 22, 2015 as having grade 3 dental disease, as defined by the program of veterinary care. These animals did not received dental cleanings by a licensed veterinarian per the instruction provided in the program of veterinary. The female was bred on August 25, 2015 and is currently nursing a litter of puppies. The animals were both identified during the inspection as having dental disease. The program of veterinary care as well as instructions from the attending veterinarian should be followed to ensure adequate care for the animals. Untreated dental disease may lead to problems consuming food as well as several conditions, such as cardiac disease, that affect the health and well-being of the animal.

Appropriate authority should be given to the attending veterinarian to ensure adequate veterinary care is provided to the animals. These dogs must be examined by a licensed veterinarian. Documentation of assessment, treatment, and plan for each dog shall be maintained for examination by APHIS officials.

Correct by having this animal examined by a licensed veterinarian per the program of veterinary care, by close of business on November 12, 2015.

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

\*\*\*An adult male Yorkshire terrier with USDA tag# 12 was noted to have severe dental disease during the inspection. He has a heavy buildup of tan material adhered to his canine teeth, pre-molars and molars. His gums are reddened and have receded back from the tooth roots and a grey to green substance has accumulated along the gum line, especially around the top canines and cheek teeth.

\*\*\*An adult female Shih Tzu with USDA tag #14 was noted to have moderate dental disease during the inspection. She has a moderate buildup of tan material adhered to her canine teeth, pre-molars and molars. Her gums are

## Inspection Report

---

slightly reddened and inflamed. She currently has a litter of puppies nursing.

These animals were identified by the veterinarian on May 22, 2015 as having grade 3 dental disease, as defined by the program of veterinary care. The licensee did not follow the instruction provided in the program of veterinary care indicating that the animal should have received care by a licensed veterinarian. The program of veterinary care as well as instructions from the attending veterinarian should be followed to ensure adequate care for the animals. Untreated dental disease may lead to problems consuming food as well as several conditions, such as cardiac disease, that affect the health and well-being of the animal.

Appropriate methods to prevent, control, diagnose, and treat diseases and injuries must be utilized. These dogs must be examined by a licensed veterinarian. Documentation of assessment, treatment, and plan for each dog shall be maintained for examination by APHIS officials.

Correct by having this animal examined by a licensed veterinarian per the program of veterinary care, by close of business on November 12, 2015.

### 3.2(d)

#### INDOOR HOUSING FACILITIES.

This facility has a small extra building adjacent to the main housing area that is used for housing dog when then main building is full. During the inspection the extra building housed two adult Shih Tzu s. The walls and ceiling of this building are constructed of materials not impervious to moisture. Areas that are not impervious to moisture may collect dirt and debris and the prolonged presence of moisture may support the growth of pathogens.

The floors and walls of indoor housing facilities, and any other surfaces in contact with the animals must be impervious to moisture. The ceilings of indoor housing must be impervious to moisture or be replaceable.

Correct by December 7, 2015.

### 3.4

#### OUTDOOR HOUSING FACILITIES.

This facility has an outdoor area that is used for exercise. This area does not have a shelter structure for the animals to get into during inclement weather. Without a shelter structure these dogs would not have a place to seek shelter from the wind, rain or snow. The Licensee must ensure that all animals have access to a shelter structure while the animals are housed in this area or the area is being used for exercise purposes.
