Certificate: **34-C-0351**
Site: 001
Gull Meadow Farms LLC

Type: ROUTINE INSPECTION
Date: 07-MAR-2024

3.129(b)

Feeding.

During inspection it was found that at least ten of plastic containers used for grain in the enclosure with the goats and alpaca had large cracks splitting the bottom of the containers. This could allow contamination of the feed from the ground and prevents complete sanitations of the food containers.

All animals must have access to wholesome, palatable food that is free of contamination and in sufficient quantity and nutritive value to maintain good health. All feeding receptacles must always be in good repair, clean and sanitary.
To be corrected by March 11th 2024

This inspection and exit interview were conducted with a facility representative.
