Type: ROUTINE INSPECTION
Date: 18-OCT-2016

3.55 REPEAT

WATERING.

The water receptacle for the rabbits is dirty and requires cleaning and sanitizing. There is a thick visible green layer of algae and growth along sides and bottom of the water pan. Drinking contaminated water can lead to disease and illness or may cause animals to stop drinking leading to dehydration. Water receptacles must be cleaned and sanitized with a sanitizing agent. All water receptacles must be cleaned and sanitized when dirty and at least once every 2 weeks.

3.125(c)

FACILITIES, GENERAL.

Two open bags of feed were noted resting on the floor of the feed/maintenance/storage shed. Four open cans without lids contained feed and/or open feed bags. Open feed containers/bags attract pests such as flies and mice which may transmit disease and lead to contamination/deterioration of the feed. All open feed bags/containers shall be stored in a manner that protects the feed against deterioration, molding or contamination. Correct by 10/23/16.

3.130(c)

WATERING.

The two water receptacles for the sheep enclosure housing two sheep are in need of cleaning. The sides and bottom surfaces are coated with a green brown slimy material. Drinking contaminated water can lead to disease and illness or may cause the animals to stop drinking water leading to dehydration. All water receptacles shall be kept clean and sanitary. Correct by 10/19/16.

The exit interview was conducted with undersigned facility representative.
