Feeding.

There are nine total bags of expired feed bags intermingled with non-expired feed bags:
One bag of Guinea Pig Diet intended for consumption by two adult capybaras and eight bags of Insectivore diet intended for consumption by two adult bat-eared foxes and one adult four-toed hedgehog. When the inspector called this to the attention of the zoo director, the expired feed was removed for disposal by employees during the inspection.
Expired food can have decreased nutritive value and palatability, which can be detrimental to the health of the animals that consume it. The licensee must ensure that all food is wholesome, palatable and free from contamination and of sufficient quantity and nutritive value to maintain all animals in good health.

Primary enclosures.

The heating fixtures in the primary enclosures of one adult male Chihuahuan raven and one adult male barn owl have electrical wires and heating bulbs that are accessible to the birds. Hot bulbs and unshielded electrical wires pose a risk for injury to the birds. The licensee must ensure that primary enclosures are constructed and maintained so that they protect the birds from injury.
