SUN COAST HEDGEHOGS LLC

Type: ROUTINE INSPECTION
Date: 19-APR-2017

3.131(a)

SANITATION.

There is one plastic cage that contained 1 hedgehog ("Nebula"). This cage is covered with a plastic lid containing several ventilation holes. When the lid was removed for inspection, a strong ammonia odor was present. The amount of odor was sufficient to cause irritation of the inspector's respiratory tract.

This cage shall be cleaned more frequently than the other cages (which are uncovered), or redesigned, so that ammonia does not build up within the cage. Excreta shall be removed from primary enclosures as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors.

Correct by April 20, 2017

This inspection and exit interview were conducted with the both licensees and their respective locations

This inspection was conducted on April 19 & 20, 2017 at both locations.
