

Inspection Report

MOTE MARINE LABORATORY
1600 Ken Thompson Parkway
Sarasota, FL 34236

Customer ID: **909**
Certificate: **58-C-0586**
Site: 001
MOTE MARINE LABORATORY

Type: ROUTINE INSPECTION
Date: 20-APR-2023

3.103(c)

Facilities, outdoor.

The Northeast portion of the 6 ft chain-link perimeter fence has a broken vertical support post. This post is laying against the fence, causing an approximately 16-foot section to lean outward. There are no upper or lower horizontal supports on this leaning section, which allows the loose chain-link fencing to dip below 5 feet in height. Animals and unauthorized people can use this damaged section to enter and exit the area and gain access to the animals behind it. The perimeter fence must be constructed so that it protects marine mammals by restricting animals and unauthorized persons from going through it or under it and having contact with the marine mammals, and so that it can function as a secondary containment system for the marine animals in the facility when appropriate. To be corrected by May 20, 2023.

3.127(d)
