Type: ROUTINE INSPECTION
Date: 23-JAN-2025

3.55 Repeat

Watering.

The primary enclosure for the six domestic rabbits had two water receptacles that contained a small amount of water and had an excessive amount of shavings and debris. This poses a risk of contamination to the enclosed rabbits. Water receptacles for rabbits must be cleaned and sanitized as often as necessary to keep them free from contamination.

3.56(a)(1)

Sanitation.

There is an excessive accumulation of fecal matter, waste and debris inside the enclosure housing six adult rabbits. This is an indication of insufficient cleaning. Accumulation of waste and fecal matter is a source of contamination and an increased disease hazard to the rabbits. The facility must implement an appropriate cleaning plan to keep the enclosure free of excreta and protect the welfare of the rabbits.
Corrected at time of inspection.

3.129(b)

Feeding.

The food dish for the fennec fox contained food that appeared to be contaminated with shavings and waste.. Food receptacles shall be placed so as to minimize contamination, and measures shall be taken to prevent molding, contamination, and deterioration or caking of food. Food receptacles shall be kept clean and sanitary at all times.
Corrected at time of inspection.

3.130 Repeat

Watering.

The primary enclosure for the hedgehogs had a water receptacle that contained a small amount of water and had an excessive amount of shavings and debris. This poses a risk of contamination to the enclosed hedgehogs. Water receptacles must be cleaned and sanitized as often as necessary to keep them free from contamination.

The primary enclosure for the silver fox had a water receptacle that contained water but had an excessive amount of shavings and debris. This poses a risk of contamination to the enclosed fox. Water receptacles must be cleaned and

Inspection Report

sanitized as often as necessary to keep them free from contamination.

The primary enclosure for the serval had two water receptacles that contained water but had an excessive amount of shavings and debris, and in one container the water appeared very dark colored. This poses a risk of contamination to the enclosed serval. Water receptacles must be cleaned and sanitized as often as necessary to keep them free from contamination.

This inspection and exit interview were conducted with a facility representative.
