POCKET PETS OF CENTRAL
FLORIDA LLC

Type: ROUTINE INSPECTION

Date: 14-APR-2022

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The program of veterinary care states that the animals must be evaluated at least once a year for internal and external parasite control. The animals had not been evaluated by the attending veterinarian since 2020. The deviation from appropriate methods to prevent, control, diagnose and treat diseases or injuries can lead to unnecessary pain or discomfort to the animals. Correct by adhering to the program of veterinary care created by the attending veterinarian. Correct by May 15th, 2022.

3.131(c)

Sanitation.

There was an accumulation of discarded feed material under the enclosure caging for 8 sugar gliders. The licensee usually vacuums underneath the cages at least once a week, but a personal injury prevented her from doing so these past two weeks. Accumulations of feed material can attract pests and cause unnecessary odors. Licensees should keep the premises clean and in good repair in order to protect animals and their health. Correct by April 17th, 2022.

This inspection and exit interview were conducted with the licensee.
