Reno, NV 89506

Customer ID: **27094**

Certificate: **88-C-0204**

Site: 001

SIERRA NEVADA ZOOLOGICAL SOCIETY

Type: ROUTINE INSPECTION

Date: 25-FEB-2014

3.75(e)

HOUSING FACILITIES, GENERAL.

Section 3.75(e) Food Storage. The food storage cargo container has a door that won't shut. This allows various pests access to the area. The slatted floor has an accumulation of old spilled food and other debris between the slats. It is important to have the food container clean and in good working order to maintain wholesome food and to keep pests out. This is necessary for health and wellbeing of the animals.

To be corrected by March 15, 2014

3.131(c)

SANITATION.

Section 3.131(c) Sanitation: The kitchen floor has had water damage to the subfloor from a leaking refrigerator and mopping. The floor has several weak, and soft spots in front of the refrigerators. The areas have been duct taped to reinforce the floor.

The underlying press board material gets damp when the floor is mopped. This has resulted hairline cracks on the edges of the squares of vinyl tile. The larger areas (where the tiles have lost their integrity) have had duct tape applied. There are six areas with the duct tape.

It is important to have the floor in the kitchen in good repair. It is important to be able to sanitize it for the health and wellbeing of the animals. It may become a safety hazard as the floor weakens in front of the refrigerators. The refrigerator leak has already been repaired.

To be corrected by February 28, 2015. This is a major repair and some thought will need to go into this repair project.

Date of Inspection: February 25-26, 2014

Prepared By: STEVE DRLICA, D V M USDA, APHIS, Animal Care
